Our Legacy Project: Gallopings Gatherings

Gallopings Gatherings was established so students could connect with other students of different grade levels. We facilitated this through Leadership and Yearbook students. The students learned so much from each other, far more than we expected! Building a connection with cross-age mentors vs. buddies helped the younger student better prepare academically, socially, and emotionally. It was truly fun and engaging for everyone! We look forward to creating more collaborative opportunities to build connections with every grade level.
