

iKnow My Class: Understand the Process

- ☐ Let students know why they are taking the survey. The survey is designed to better understand the learning environment from each student's perspective.
- ☐ Remind students to only think of your class when responding.
- ☐ If students don't understand a question, feel free to clarify.
- ☐ Remember that the class owns the data, not just the teacher. Students and teacher together must share responsibility for classroom engagement.
- ☐ **Debrief the survey with students.** Ideally, do this live once students complete the survey. Choose a few statements to discuss with students. Ask for further clarification, insights and ideas of how a change can be made together.
- ☐ Explore Next Practice resources linked to areas identified for improvement.
- ☐ Debrief the survey results with colleagues.
- ☐ Redeploy the survey at a future date and complete the same process.
