

STRENGTH FOR SUCCESS: PERSONAL TALENTS AUDIT

Talents are the interplay between a person's natural gifts and acquired skills. This synergy between innate strengths and learned abilities helps individuals lead more purpose-driven and satisfying lives, contributing to personal growth and professional success. Over time, engaging with one's talents can lead to the discovery of deeper gifts and the development of further skills, enhancing one's purpose and impact on the educational community.

Reflect on your Talents:

- Among your talents, which ones do you take the most pride in?
- What three talents would your friends or family members say you possess?
- What three talents would your students say you possess?
- Which of your talents are you currently working to improve?
- How have your values, passions, and aspirations shaped the talents you've developed?
- In what ways do you apply your talents to benefit others?
